### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. In view of applicant's amendments and arguments, the section 112, second paragraph rejections, section 102 rejection over Parthasarathi, section 102 rejection over Kubota, and section 103 rejection over Carr of the Office Action mailed on 6 August 2004 are overcome. Hence, these rejections are withdrawn.
3. Matsumoto et al. USP 6,723,628 teaches semiconductor devices having a pad section which comprises aluminum alloys. Matsumoto suggests that the aluminum alloy may comprise magnesium. However, rejection is not appropriate because Matsumoto teaches and suggests that the aluminum alloy containing magnesium is to comprise the bond pad itself, not that an aluminum and magnesium alloy is to be disposed over a bond pad, as required by the claims.
4. None of the reviewed prior art nor prior art of record teaches or suggests the claimed subject matter. Particularly, disposing an aluminum and magnesium alloy layer over a bond pad in an under bump metallurgy is not taught or suggested.
5. Claims 7-15 are allowed.
6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
